OBJECTIVE

A Software developer who is driven by ambition and detail with a solid foundation in developing mobile applications. My objective is to utilize my abilities in Kotlin and Android SDK to create mobile solutions that are both innovative and user-centric. Committed to enhancing the user experience and promoting project success by continuously learning and collaborating in a dynamic team environment.

PROJECT

TAX ESTIMATION

- Mobile Developer with experience in building user-centric applications and a strong understanding of version control system
- Tax bracket determination: Calculate the user's tax bracket based on their income level and filing status (single,married filing jointly,married filing separately, or head of household)
- User-friendly interface: Ensure the app has an intuitive design that makes it easy for users to input their financial information and navigate through the tax estimation process.

CAR RENTAL

- Google Sign-In with Firebase Auth and Firestore and Developed a custom Admin Panel To manage Firestore to check user profiles and add payment card details
- Developed backend functionalities for CRUD operations (Create, Read,Update, Delete) to manage expense and categories
- Designed and implemented the database schema using [SQLITE]
